Address

320C Royal Road, Massey,
Waitakere City, Auckland

Language

English (Fluent)

Korean (Native)

Professional Strengths

Troubleshooting Mindset

Clear Communication

Customer-Centric Approach

Documentation & Process

Team Collaboration

Adaptability & Fast Learning

Profile

Curious and adaptable second-year Diploma student building a strong foundation in systems, cloud, and software development. Brings well-developed problem-solving and teamwork skills from 10+ years of leadership and customer-focused experience. Passionate about learning new technologies and eager to grow within a collaborative environment while contributing to meaningful technology outcomes.

Technical Skills

Systems & Infrastructure

Windows 10/11, Windows Server, Active Directory, Hyper-V, DNS, DHCP

Cloud Technologies

AWS, Microsoft Azure, Cloud Deployment, Monitoring, Infrastructure Fundamentals

Microsoft Ecosystem

Microsoft 365, Teams, Outlook, OneDrive, SharePoint, Entra ID (Fundamentals)

Programming & Databases

Python, Flask, PowerShell, MySQL, PostgreSQL, HTML, CSS, C++

IT Support & Hardware

PC Assembly, Hardware Troubleshooting, System Deployment, Performance Optimisation

Development Tools & Methodologies

Git, GitHub, Agile, Scrum, Version Control

Education

Yoobee College of Creative Innovation

Diploma In Software Development (Year 2), 2025 – Present in Remote
Certificate In Information Technology, 2025 Graduated

Auckland University of Technology (AUT)

Diploma In Mechanical Engineering (not completed), 2008 – 2010

Certifications

AWS Certified Cloud Practitioner (CLF-C02)

Microsoft Certified Azure Fundamental (AZ-900)

Interests

Cloud technologies &
Scalable infrastructure

System administration &
troubleshooting

Cybersecurity basics &
access control

Software Development
fundamentals

Hardware optimisation

Learning new tools and
emerging tech trends

Work Experience

PAINT PARTNER LIMITED – Painter / Operation Manager **Auckland | 2010 – 2012, 2014 – 2025**

- Managed end-to-end project operations including scheduling, quoting, and workflow coordination
- Provided technical troubleshooting for office systems (PCs, Printers, WiFi, Mobile devices)
- Led and trained team members, ensuring consistent quality and safe work practices
- Handled invoicing, procurement, and client communication with strong customer service focus
- Performed QA checks to ensure consistent workmanship and compliance with standards
- Conducted QS tasks such as material estimation, cost calculation, and job scoping

I Model Agency – Management Team Leader **Seoul, South Korea | 2013 – 2014**

- Coordinated schedules and bookings between clients and 50+ freelance models
- Managed day-to-day operations including communication, documentation, and workflow organisation
- Improved onboarding and administrative processes, reducing paperwork time
- Ensured smooth coordination across teams, maintaining accuracy, professionalism, and timely delivery

Technical Projects

Cloud Application Deployment & Infrastructure Management

- Designed, deployed, and tested cloud-based environments using AWS and Azure services.
- Implemented resource provisioning, monitoring, performance optimization, and cost-conscious cloud architecture practices.
- Applied cloud security, availability, and infrastructure management principles through hands-on lab and project work.

Full-Stack Software Development & Database Implementation

- Designed and developed web applications using Flask, Python, HTML, CSS, and JavaScript.
- Integrated MySQL and PostgreSQL databases to support application functionality and data management.
- Performed application testing, debugging, and deployment while maintaining version control through Git.

Agile Team Software Development

- Collaborated within Agile development teams using Scrum methodologies.
- Participated in sprint planning, backlog management, stand-ups, testing, code reviews, and project documentation.
- Developed software solutions using Python, C++, Git, and collaborative development workflows.

Active Directory & Windows Server Administration

- Configured Windows Server environments and Active Directory domains.
- Managed user accounts, group policies, permissions, DNS, DHCP, and domain services.
- Performed network configuration and troubleshooting within virtualized lab environments.

Virtualisation & Systems Administration

- Built and maintained Hyper-V virtual machine environments for testing and system administration activities.
- Configured and optimized virtual infrastructure while performing troubleshooting and performance tuning.

IT Support & Technical Operations

- Installed, configured, and maintained Windows operating systems and desktop environments.
- Performed hardware diagnostics, software troubleshooting, driver management, and performance optimization.
- Supported system setup, user configuration, and technical issue resolution across various environments.

PC Hardware Installation & Troubleshooting

- Built custom desktop systems and performed hardware upgrades, component replacement, and fault diagnosis.
- Resolved hardware, connectivity, and operating system issues using structured troubleshooting methodologies.
