RELEVANT IT PROJECTS & ACADEMIC LABS

Windows Server & Active Directory Lab

- Configured Windows Server virtual machines using Hyper-V as part of academic coursework.
- Practised creating and managing users, groups and permissions in Active Directory.
- Worked with basic Group Policy, DNS and DHCP configuration.
- Performed basic troubleshooting within a virtualised Windows environment.

IT Support & Hardware Labs

- Built and upgraded custom desktop computers.
- Performed hardware diagnostics, component replacement and fault finding.
- Installed and configured Windows operating systems.
- Troubleshoot hardware, connectivity, driver and operating system issues.
- Applied structured troubleshooting to identify and resolve technical issues.

Cloud Computing Coursework

- Completed academic labs using AWS and Microsoft Azure.
- Practiced cloud deployment, infrastructure and monitoring concepts.
- Studied cloud security, availability, connectivity and resource management.

Software Development Projects

- Developed applications using Python, Flask, C++ and web technologies as part of coursework.
- Worked with MySQL and PostgreSQL databases.
- Used Git and GitHub for version control and collaborative development.
- Participated in Agile/Scrum development activities including sprint planning, testing and documentation.

Work Experience

PAINT PARTNER LIMITED – Painter / Operation Manager

Auckland | 2010 – 2012, 2014 – 2025

- Provided day-to-day troubleshooting for office PCs, printers, Wi-Fi and mobile devices.
- Supported customers and team members with technical and operational issues.
- Managed customer communication, issue resolution and service requests.
- Coordinated schedules, workflows and day-to-day business operations.
- Trained team members and maintained consistent processes and quality standards.
- Managed documentation, procurement and administrative processes.

I Model Agency – Management Team Leader

Seoul, South Korea | 2013 – 2014

- Coordinated schedules and day-to-day operations for clients and 50+ freelance models.
- Managed communication, documentation and workflow coordination.
- Supported onboarding and administrative processes.
- Worked across teams to maintain accurate and timely delivery of services.
